		5-700950	Eiris Upgrade package from EIRIS V4.x to EIRIS V4.9.x	1,250	500
Expansion Products		5-ERS04201	Incremental License for additional 16 Elpas Devices	1,548	619
		5-ERS04202	Incremental License for additional Client Connection	1,145	458
EIRIS Extensions & Applications		5-ERS09048	Communication Package (Pager+SMS+Email)	2,300	920
		5-ERS09051	Nurse Call Auto-Cancellation Extension	2,300	920
		5-ERS04401	Visitors Module	2,450	980
		5-ERS08033	CCTV Integration Extension	2,500	1,000
		5-ERS04301	EV2 BabyMatch User Interface	6,668	2,667
		5-ERS08035	Tag Match Extension for Tag Escort and Match Tests	4,250	1,700
		5-ERS04150	Rauland Interface Extension	TBD	TBD
	New	5-ERS08320	Temperature Monitoring Module – EIRIS 4.7.2 & Higher	2,500	1,000
		5-ERS04403	Parking Capacity Control Module	1,175	470
EIRIS SDK		5-ERS08011	EIRIS SDK Basic, includes web services, one year e-mail support, (requires SDK Training)	8,750	3,500

[1] **The Eiris Base Package includes Server for 10 Elpas Devices , 3 concurrent client connections, EV2 client software, History Recorder, Report Generator and Watchdog Software. Each EV2 and History Recorder session consumes a separate client connection when in use.**

[2] **Devices: IR Reader, RF Reader, Elpas Local Controllers, LF Exciter Standalone/Master/Slave.**

Redundant Eiris

When using the Eiris Redundancy Watchdog for a redundant, high availability Eiris architecture, then the both servers need to be licensed independently with separate license keys which support the necessary number of readers and used extensions. These licenses need to be issued as "Master" licenses in order to be able to run a database originating on a foreign machine.

At this time, Elpas waives the charge for the additional readers and extensions for the second licence. Therefore, a full license including extra reader packs and extension fees, need be ordered for a single machine. Only a base package (5-ERS04101) needs to be ordered for the second server.

Multi Site Eiris
When using the Remote Site extension to create a multi-site Eiris architecture, then all remote sites need to be licensed for all connected readers plus any for-charge extensions. The master server must be licensed for the total of all readers from all remote sites.

At this time, Elpas waives the charge for the additional reader packs which may be needed on the master machine. Therefore, a full license including extra reader packs and extension fees, must be ordered for each remote site server. Only a base package (5-ERS04101) needs to be ordered for the master server.
