

MODEL: R5K CRIMPING TOOL

R4KCRIMP

FEATURES

- Insulation displacement tool used to simultaneously crimp all wires for the Responder 5000 K-Bus
- Color-coded for proper wire order
- Contains convenient pop-out metal removal tool
- Single tool combines two functions in one

SPECIFICATIONS

Material: Body: Lexan (UL 94-5B), white. Metal insert: 20 gauge stainless steel

Size: **W:** 1.83" (4.65 cm) at max dimension

H: 3.25" (8.25 cm) (closed position)

DESCRIPTION

The R5K R4KCRIMP crimping tool is used to simultaneously attach 6 or 8 wire conductors to the CONN6 or CONN8 connectors used with Responder 5000 patient stations, corridor lights, domeless controllers, and all headend devices. The tool also contains a convenient metal pop-out removal tool for use in removing the Responder 5000 stations and corridor lights from their mounting plates.

The R4KCRIMP tool is color-coded to ensure proper conductor order and matches the colored wires in CAT5 cable used to form the Responder 5000 K-Bus.
