

## MODEL: R5K FEATURE BED INTERFACE

R4KFB1

### FEATURES

- Interfaces with feature beds using Responder 5000 bed stations
- Transfers all nurse call and entertainment functions to the bed
- Simple, easy plug-on connectors

### SPECIFICATIONS

**Power Required:** 15.5V @ 5mA

**Weight:** 0.10 lbs. (0.05 kg)

**Size:** W: 2.50" (6.35 cm)

H: 3.15" (8.00 cm)

D: .375" (.953 cm)

**Terminations:** Pre-wired pigtails

**Backbox Options:** Mounts in (deep, quad) backbox behind

Responder 5000 patient stations or in a three-gang backbox with adaptor plate (not included)

**Certification:** Designed for compliance to ANSI/UL 1069, IEC 60950, CE, RoHS / WEEE Compliant. Assembled in a U.S. FDA Registered facility..

### DESCRIPTION

The R5K Feature Bed Interface Module provides the circuitry to interface a feature bed to a Responder 5000 patient station. With this interface, all nurse call and entertainment functions are transferred to the bed. The R4KFB1 allows for additional features including intercom to the Console over the bed rails. When used with pillow speakers, the R4KFB1 provides the capability of intercom over the pillow speaker with simultaneous muting of any concurrent

pillow speaker program (television).

The R4KFB1 – Feature Bed Interface Module is encased in insulated shrink tubing. Its compact size permits mounting behind Responder 5000 patient stations, or inside a separate three-gang backbox with adaptor plate (not included).
