

MODEL: R5K TEST ADAPTER CABLES

R4KSTAC
(Cables only; tester not included)

FEATURES

- Convenient connection method to test cable wiring
- Helps identify wiring errors to avoid complex troubleshooting
- Interfaces to industry-standard cable testers

SPECIFICATIONS

Dimensions: Cable length: 8.9cm (3.5")

Terminations: RJ45 connector, 8-pin plug-on connectors

DESCRIPTION

The R4KSTAC adapter cables can be used with the Siemon STM-8 cable tester or other equivalent cable testers to insure continuity and verification of the K-Bus (and station) wiring. The adapter cables provide immediate indication of incorrect cable wiring. Cable verification prior

to system activation helps avoid complex troubleshooting. Test cable length is approximately 8.9cm (3.5"). R4KSTAC provides two (2) cable adapters. (Note the photo shows the adapter cable with tester; the tester is not included with R4KSTAC).
