

MODEL: R5K DIGITAL TV ISOLATION MODULE

R4KTVR1

FEATURES

- Provides isolation of digital TV interference from Nurse Call
- Plug-in connectors for easy service

SPECIFICATIONS

Power Required: 15.5V DC @ 15 mA

Dimensions: W: 2.5" (6.4cm)
H: 1.6" (3.9cm)
D: 0.5" (1.19cm)

Terminations: Plug-on connectors

Backbox Options: Mounts in station backbox

Housing: Shrink wrapped module

Certifications: Designed for compliance to ANSI/UL 1069, IEC 60950, CE, RoHS / WEEE Compliant. Assembled in a U.S. FDA Registered facility.

DESCRIPTION

The R4KTVR1 Single Bed Digital TV Isolation Module is a shrink-wrapped module with two eight-conductor plug-in connectors and two three-conductor plug-in connectors. The module provides audio and data isolation between the UL listed digital TV and enhanced stations of the nurse call system. One R4KTVR1 would be associated with a single bed station with one TV and two R4KTVR's would be associated to a dual bed station with 2 TVs. The compact size of the R4KTVR1 permits its easy mounting in a station backbox. The R4KTVR1 Single Digital TV Isolation Module is Underwriters Laboratories, Inc. listed (UL1069).
