**Certifications:** Designed for compliance to ANSI/UL 1069, IEC 60950, CE, RoHS / WEEE Compliant. Assembled in a U.S. FDA Registered facility.

### DESCRIPTION

The R5KPADP Adaptor Plate provides a flat, even surface when mounting Responder 5000 patient stations. It is mounted behind the station backplate. The Adaptor Plate will cover gaps in over-sized backbox cut-outs. It also helps prevent damage to wall surfaces if a station requires removal from a wall.

The Adaptor Plate is packaged in 10 pieces per carton. It does not ship with each patient station.
