Terminations: Plug on connector, CAT 5 and CAT 6 compatible

Certifications: Designed for compliance to ANSI/UL 1069, IEC 60950, CE, RoHS / WEEE Compliant. Assembled in a U.S. FDA Registered facility.

DESCRIPTION

The R5KPS1V provides one DIN receptacle for use in a tone/visual system. Call cords are typically used to initiate a call although pillow speakers can also be used to place a call along with providing entertainment audio and control.

The station is continuously supervised for station presence. A "Trouble" message will also announce at the covering console(s) if the station is removed from the system or becomes non-functional.
