Grassobbio, September 16th, 2016

We hereby advise our customers, which was created a new Monoblock HF1 R/8

code XRM.11.I22.001 and code IRM.36.003.001 (for Monoblock with RTM780 H + Cooling Kit), only to distinguish it from the same , but with a different new X-ray tube.

Therefore, the Monoblock remains the same, and the two different codes highlight the purchase with X-ray tube IAE RTM780 H 0.3/0.6 , because the X-ray tube Philips RO 0306 0.3/0.6 will be discontinued and will be replaced with new IAE .

*The new monoblocs will be perfectly interchangeable with the previous versions.
The technical documentation will follow the monoblocs.*

The introduced changes will be treated in conformity to the annex II of 93/42/EEC Directive and f.m.

The devices continue to satisfy the requirements of the directive

Distinti saluti.
Regards.
